Born May 2004 | Class of 2023

Total repository stars: approx. 2.5k | **ACM team member (Silver)** | **National Encouragement Scholarship ×5**

Education

Fudan University (Recommended Admission) FVL Laboratory, College of Computing and Intelligence — Sep. 2027–Jul. 2030
Computer Science (Direct-entry Master's); Advisors: Xingjun Ma and Yu-Gang Jiang (Vice President)

Fudan University (Research Intern) **Institute of Trustworthy Embodied AI** & **FVL Laboratory**; — Mar. 2026–Present
Advisors: Xingjun Ma and Yu-Gang Jiang (Vice President)

University of Shanghai for Science and Technology (Undergraduate) — Sep. 2023–Jul. 2027
School of Optical-Electrical and Computer Engineering; **Computer Science and Technology (Academician Innovation Class)**; **Rank: 3/85**

Research interests: LLM Coding agent Agentic Training TrustWorthy AI
English CET-6/CET-4: 516/522

Software copyrights: DL-Driven Robust Digital Watermarking Network Application and Code Security Analysis System Based on CodeQL and LLMs. **First author of both.**

Patent application: A related application from the **Key Laboratory of Information Network Security, Ministry of Public Security (Third Research Institute of the Ministry of Public Security)** is under review.

Research Experience

MemHarmBench: Cross-Session LLM Agent Safety Benchmark for Persistent Memory Poisoning — Jul.–Oct. 2026

Visiting student advised by **Yu-Gang Jiang** & **Xingjun Ma**, College of Computing and Intelligence, Fudan University
Recommended by Shanghai Innovation Institute | **Recommended by MiraclePlus Alpha Sight** | **WWW 2027 (submitted)** | **First Author**

- Built an "exposure–trigger" benchmark for cross-session memory poisoning with **288** case environments (**24** attack templates × **12** business scenarios) and **12** target categories.
- On samples retaining malicious rules, cross-session indirect attack success reached **59.38%–76.39%**, exposing decision manipulation despite otherwise normal execution.

Paper: https://arxiv.org/abs/2611.01700 **Code:** https://github.com/Kirito14IT/MemHarmBench

ScamWeb: A Multimodal Benchmark for Fraud Webpage Detection, Fine-Grained Classification and Evidence Grounding — Apr.–Aug. 2026

Research intern advised by **Xingjun Ma** & **Yu-Gang Jiang**, Institute of Trustworthy Embodied AI, Fudan University
AAAI 2027 (accept*3 weak reject*1) | **First Author**

- Built a multimodal benchmark of **10,026** webpages spanning **25** fraud categories and **47** languages; proposed training-free ScamDet for detection, fine-grained classification and evidence grounding.
- Achieved binary-classification F1 of **78.7%**; zero-shot evaluation on a **3,324**-page fraud subset yielded **97.3%** recall and **63.9%** fine-grained classification accuracy.

XSafeClaw: Trustworthy Runtime Safety Governance for Agents ★ Stars 165 — Mar.–Jun. 2026

Featured in Synced

Institute of Trustworthy Embodied AI, Fudan University | Advisor: **Xingjun Ma** | Featured in "Latest Research" on the institute homepage | **Core Contributor**

- Provided session risk assessment, tool interception and human approval for OpenClaw, Hermes and nanobot, supporting safety protection across multiple Agent runtimes.
- Led nanobot integration, unified session identities and tool events, implemented concurrent communication and token and cost accounting across three runtimes, and strengthened safety and integration tests.

Coverage: https://mp.weixin.qq.com/s/1Dp5uTasxnm3ues_hNPlWQ

SFMambaNet: Spectral-Frequency Enhanced Selective State Space Model for Correspondence Pruning — Sep. 2025–Feb. 2026

Fujian Provincial Key Laboratory of Network Computing and Intelligent Information Processing, Fuzhou University | Advisor: Yizhang Liu | IEEE TIP (CAS Q1 Top, CCF-A) | **First Author**

- Designed local spectral-geometric attention and frequency-gated bidirectional Mamba to suppress high-frequency outlier noise with near-linear complexity ($O(N \log N)$).
- Reached mAP5° of **73.83** on unseen YFCC100M scenes (SIFT), **6.23** percentage points above MatchMamba, with **2.01M** parameters.

Paper: https://arxiv.org/abs/2606.04493 **Code:** https://github.com/Kirito14IT/SFMambaNet

Internship Experience

Key Laboratory of Information Network Security, Ministry of Public Security (Third Research Institute, Shanghai) AI Research Intern — Apr. 2026–Present
Advisor: Songyang Wu **Project 1:** Independently built a joint webpage image/text and URL analysis pipeline with fraud-evidence grounding; completed **one paper as sole first author**.

Project 2: Designed a **lightweight algorithm for discovering risk topics in short texts**, combining character-level and frozen semantic features to aggregate risk evidence from group chats for fast CPU screening.

International Organization (United Nations Volunteers)–UNDP Research Intern (Remote) — Jan.–Apr. 2026
Advisor: Johnny **Project:** Worked remotely to clean, organize, analyze and visualize data collected by the team, and produced a research report.

Competition Experience

2025 ACM Shanghai Collegiate Programming Contest	**Silver Medal**	Jul. 2025
16th Lanqiao Cup National Software and Information Technology Professional Talent Competition, National Finals, C/C++ (2025)	**National Second Prize**	Jun. 2025
2025 RAICOM Robot Developer Competition, Programming Track, National Finals	**National First Prize**	Aug. 2025

Skills and Service

Programming and tools: C/C++, Python; PyTorch/TensorFlow, vllm; Transformers, Codex, Claude Code;
NeurIPS 2026 Reviewer
